OUR HERITAGE

The BIG Journey

24 Years of Excellence

Since inception, our business philosophy has remained simple: unlock fundamentally strong, technically sound, and sentimentally stable investments. Yet, above all, our pursuit of excellence has always centred on exceptional service, trusted relationships, and meaningful delivery for our esteemed clients.

This philosophy has evolved through an epic journey, shaping who we are today and continuing to guide us towards tomorrow.

2002

The BIG journey began in 2002, when our founding member, Muhammad Husnain Yasin, received PKR 25,000 in support from his mother to make his first investment in the Pakistan Stock Exchange. With little knowledge but a willingness to learn, discipline, and patience, his investment grew steadily, helping him support his family and fund his professional education.

2006

In 2006, Husnain moved to England, where he earned his Chartered Accountant qualification from ICAEW. Over the following 15 years, he progressed from assistant accountant to Board level leadership, gaining experience across industries and major economic cycles, including the 2008 Global Financial Crisis. These experiences and relationships shaped his belief that wealth is most meaningful when built through Shariah-compliant investments.

2021

An alumnus of Cambridge Judge Business School, and with academic engagement at the University of Oxford, Husnain returned to Pakistan in 2021; and founded Blackstone Islamic Global to help others approach investing with entrepreneurial acumen and foresight.

Our ambition

What began with PKR 25,000 support from his mother has grown into an inspiring ambition to help individuals and institutional clients build, preserve, and steward wealth with wisdom, faith, and agility.
